M SAQLAIN
SOFTWARE ENGINEER

SUMMARY

I am a senior year Information Technology Student at The Islamia University of Bahawalpur. I'm working as a Software Engineer at Upwork, also exploring Web 3.0, Blockchain, and Metaverse. Equipped with a record of success in consistently identifying and providing the technological needs of companies through ingenious innovation. I believe technology requires continuous skills updation so I am always trying to develop more market up-to-date skills.

WORK EXPERIENCE

Software Engineer, At Upwork (Remote)

June 2022 – present | Remote, USA

Building a platform to help people excel in their careers, a platform specifically for learning, opportunities, networking, and growth. Using React, typescript and tailwindcss on frontend to build a fast and optimized platform

Junior Flutter Developer (Remote)

February 2021 - April 2022 | Remote USA
Implemented the Provider state-management framework within the application.Worked with firebase at the back end of the project. Worked closely with the product management team to implement new features on the mobile app. Fixed bug issues within the application.
